Air Quality

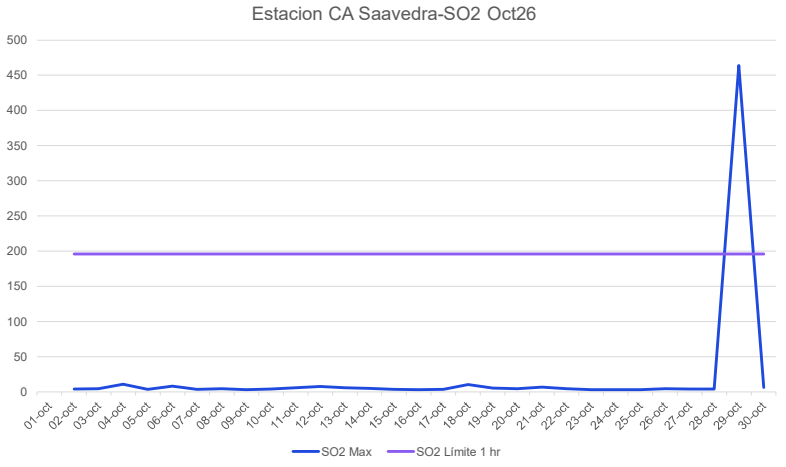

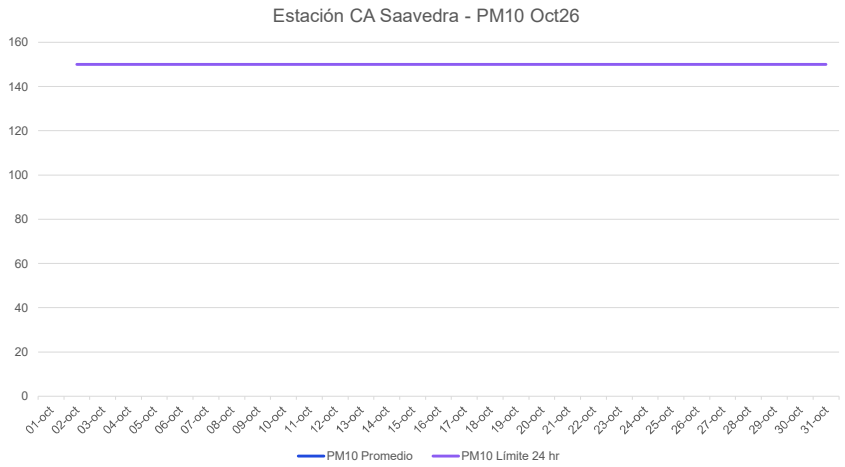

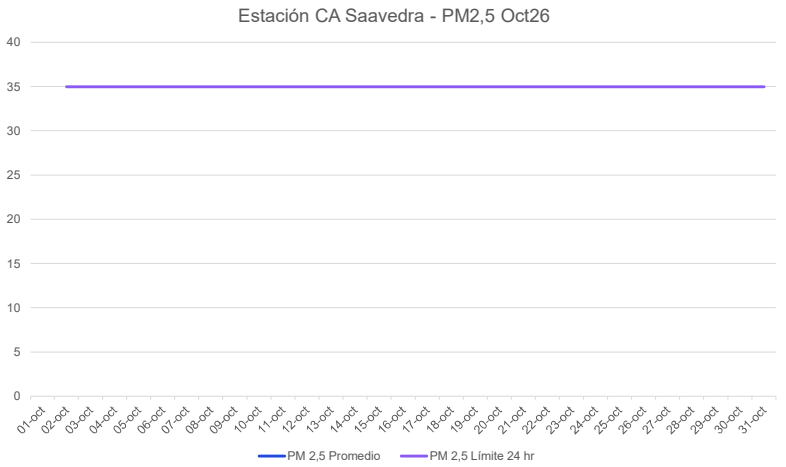

AES Argentina
October 2026

Saavedra Station

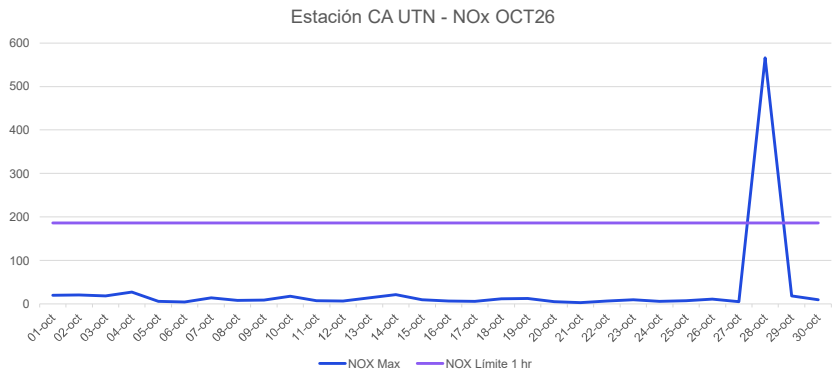

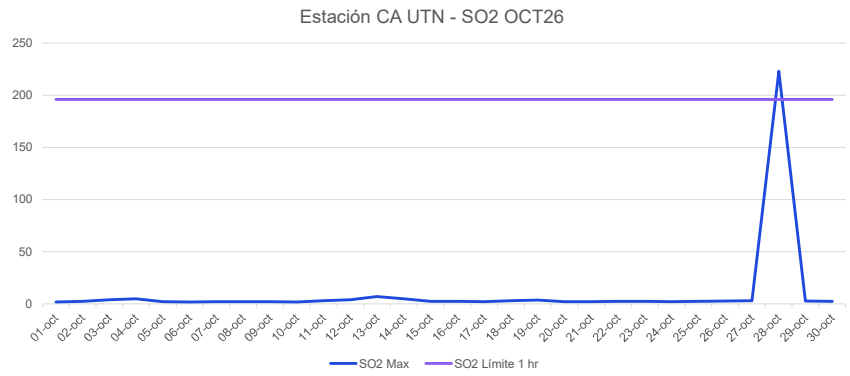

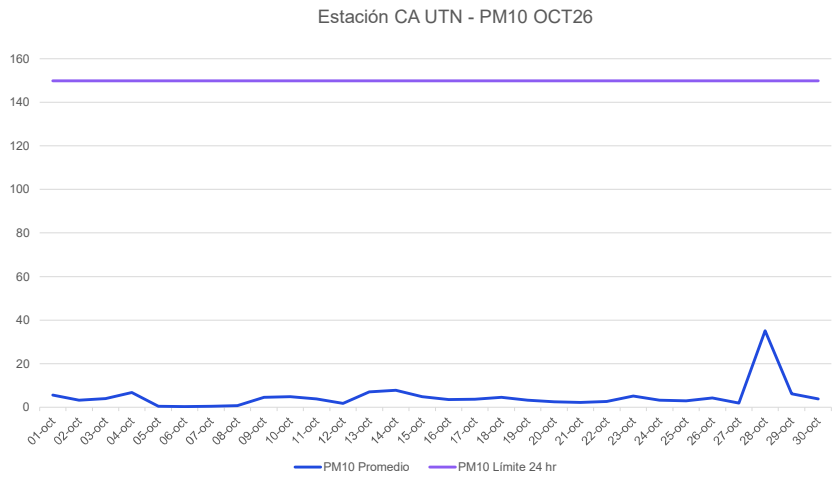

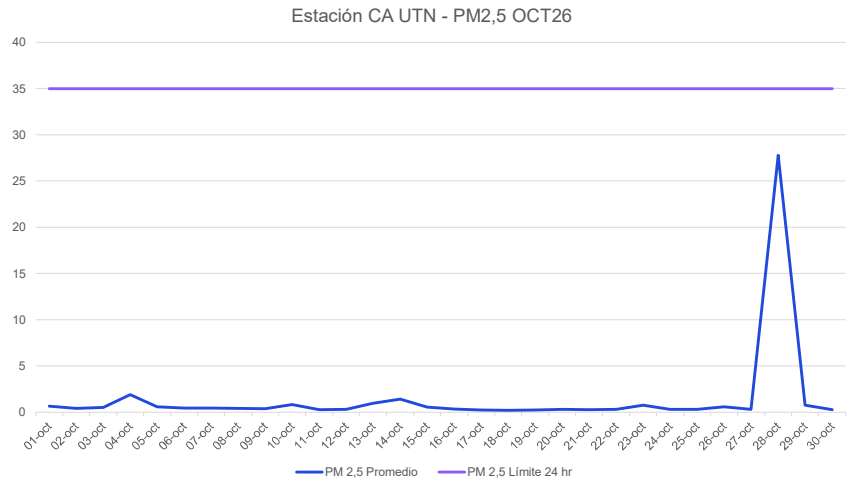

There was one day (October 29) where levels exceeded the legal limit; this coincided with equipment calibration. The PM10 and PM2.5 monitoring equipment has been removed and is awaiting a replacement part, which is expected to be installed by the end of November 2026.

UTN Station

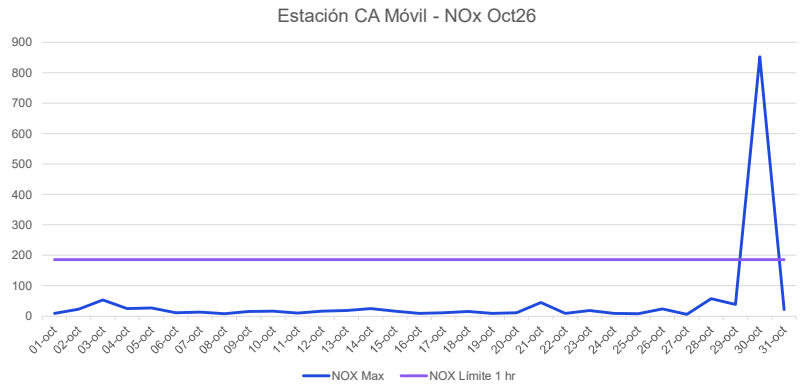

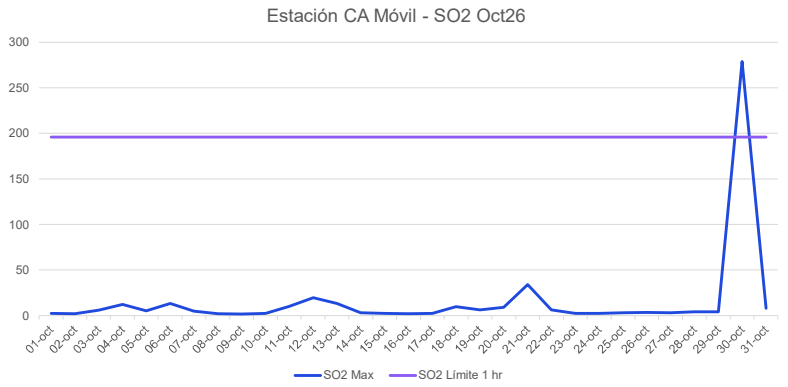

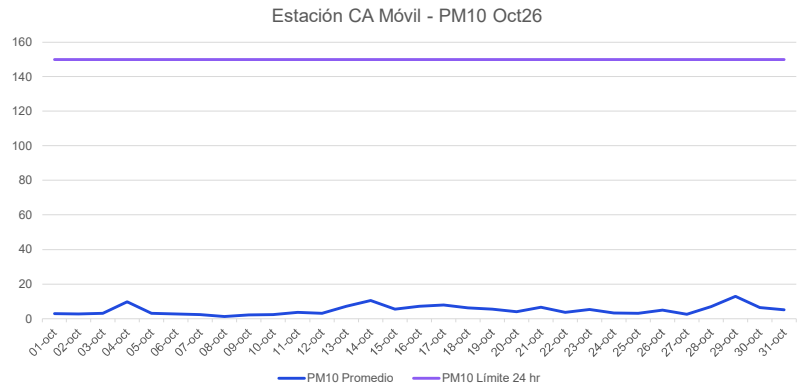

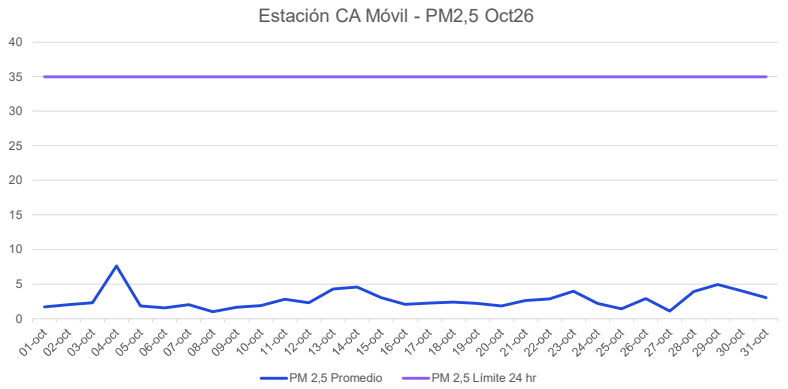

There is one single day (October 28) above the legal limit, which corresponds to a calibration day.

AES Powerplant Station

Only one day (October 30) is observed above the legal limit; this corresponds to a calibration day.
